

In the Oil Fields

E. R. HOUSTON RETURNS.

E. R. Houston, assistant secretary and treasurer of the Sinclair Oil & Gas Refining Corporation, returned yesterday from New York city, where he, with other company officials, has been for several weeks arranging the organization of the company.

A. H. White, assistant to the president of the company, may not be back in Tulsa for some time and his family has gone to New York to join him. President H. V. Sinclair of the company is expected in Tulsa today for a short time.

AT MORRISON.

The Wolverine test of the Roly Trenchard farm in the northwest of section 24-17-12 is under way. It is 1,200 feet in the northwest of section 24-17-12.

The Carter Oil company is rigging up to deepen its test on the Willie Lewis farm in section 24-17-12 to the Bartlesville sand.

WAGONER COUNTY.

Brown and Brown are shut down at 1,250 feet in their test in the southeast of the northwest of section 24-17-12.

Loddy and others are drilling at 1,250 feet in the southwest of the northwest of the northwest of section 24-17-12.

Barry and others are drilling at 950 feet in their test on the Leno farm in the northwest of the southwest of section 24-17-12.

SOUTH CUSHING EXTENSION.

The Hill Oil & Gas Co. is rigging up its No. 1 on the Durant farm in section 24-17-12.

The Carter Oil company is rigging up to deepen its test on the Willie Lewis farm in section 24-17-12 to the Bartlesville sand.

The Hill Oil & Gas Co. is drilling at 1,250 feet in its No. 2 on the Almon Sawyer farm in section 24-17-12 and No. 1 is rigging up.

The Sinclair Oil company No. 2 on the Lusk farm in section 24-17-12 is fishing at 1,250 feet.

The Sinclair Oil company No. 1 on the Brown farm in section 24-17-12 is due in the Bartlesville sand.

MAY FIND AN OUTLET.

An important test that may find the outlet of the fine Ponca City pool

has been located and will be drilled by the Marland Oil company and the Caden Oil & Gas Co. It is in the south half of 24-17-12 east on some of the best structure that has been found in Oklahoma.

This test lies six miles northwest of the Ponca City field, and, according to geologists who have been over the country, may prove to be the long looked for outlet to the Ponca City pool. A 50-barrel well on the northwest side of the south half of section 24-17-12, east on some of the best structure that has been found in Oklahoma.

AROUND OKMULGEE.

Rumley and others have a rig up for a test in the northwest of the northwest of section 24-17-12.

The Oklahoma Producing Oil company is drilling at 1,250 feet in its No. 1 on the Durant farm in section 24-17-12.

The Durant Oil company has a rig up for a test in the northwest of the northwest of section 24-17-12.

The Durant Oil company has a rig up for a test in the northwest of the northwest of section 24-17-12.

AFTER GAS CONVENTION.

A number of Tulsa oil and gas producers met last night at the Tulsa Hotel to discuss the proposed convention of the National Association of American Oil Producers, which opens in Tulsa May 16 to 19.

Robert T. Braden and H. H. Bartlett, president and secretary of the Oklahoma Natural Gas company, W. J. Bayley, manager of the Caden & Oklahoma Gas Co., A. W. Leno, and of the Devonian interests, Henry H. Greis, oil and gas producer, and W. H. Park, comprised the party.

It is expected that Tulsa will make a determined effort to land the convention for 1917.

BRYAN COUNTY.

D. N. Wheeler and associates are again drilling in 24-17-12 after being shut down 12 days rebuilding derrick and putting in calf wheel attachment. They are now 700 feet and coming along fine. This well is being watched with a good deal of interest and the geological hope has been handed out very encouraging.

The S. H. Longfellow well in 24-17-12 is drilling at 950 feet after being shut down with casing trouble for two weeks.

AT STONE BLUFF.

Caden and others No. 2 on the Nalley Taylor farm in 24-17-12 is dry and abandoned at 1,275 feet.

Simmons and others are moving in a rig for a test on the Mooney farm in the northwest corner of the southwest of 24-17-12.

The Hill Oil & Gas Co. test on

the south line of 24-17-12 in the river bed got 8,000,000 feet of gas at 1,135 feet and is setting a Bradfordhead to go on down.

The Sinclair Oil & Gas Co. No. 4 on the Gray farm in 24-17-12 is about ready to drill in.

AT JENKS.

The Wolverine Oil company is drilling at 1,200 feet in its No. 1 on the river bed in section 24-17-12.

Fuller and Leeper are rigging up for their No. 2 on the P. Parks farm in section 24-17-12.

The Matson Oil company shot its test in the north half of the north-east quarter of 24-17-12. No. 2 on the Wilbur Cadden farm. It is good for 18 barrels in the 1,250-foot sand.

SOUTH OF HASKELL.

Smith and Watson are drilling at 550 feet in the southeast of the south-east of 24-17-12.

Smith and Watson have a 10-barrel well on their test in the southeast of the southeast of 24-17-12 at 757 feet.

Smith and Cline have a rig up for a test in the northwest of the north-east of 24-17-12.

The Caden River Gas company's test in the southeast of the southwest of 24-17-12 is drilled at 1,275 feet.

AT BALD HILL.

Richardson and others are drilling at 1,200 feet in their No. 2 in 24-17-12.

The Wolverine Oil company's No. 2 in 24-17-12 is a test.

Richardson and others No. 1 on the Durant farm in 24-17-12 is a rig.

IN THE COLE POOL.

The Tulsa Oil company's No. 1 in section 24-17-12 has a crooked hole at 1,450 feet.

The Caden Oil & Gas Co. No. 5 in the northeast of section 24-17-12 is fishing at 1,000 feet.

The same company's No. 6 on the southeast of section 24-17-12 is fishing at 900 feet.

J. C. Coyne's No. 4 in section 24-17-12 is good for 10 barrels.

AT CUSHING.

The Chamite Refining company is drilling at 300 feet in its No. 1 in the river bed in the north half of the northwest of the northwest of section 24-17-12.

The Producers Oil company No. 29 on the Harjo farm in section 24-17-12 is making 155 barrels. No. 21 is spudding and a rig is up for No. 22.

The Harjo farm oil company has a rig up for a test on the J. Brown farm in section 24-17-12.

AROUND BIXBY.

Gallbreath and others No. 1 on the Steve Lowery farm in section 24-17-12 is drilling at 1,100 feet.

Rosser and others are drilling at 1,000 feet in their test on the C. P. Caden farm in section 24-17-12.

Cox and others are drilling at 1,450 feet in their No. 1 on the Jack Lewis farm in section 24-17-12.

SOUTHWEST OF OKMULGEE.

The Caden-Watson shallow-sand well in 24-17-12, which got 75 feet of sand at 475 feet, is good for 30 barrels after a shot of 100 quarts and certainly makes that part of the country look fine for a shallow field.

The test effects the Caden and others deep gas well, which is slowly turning to an oil well.

AT BIXBY.

Wilson and others test in the northeast of the east half of the southwest of section 24-17-12 is still having trouble with the casing on top of a good looking sand at 1,420 feet.

Wilson test in the northeast of the north half of the southwest of section 24-17-12 is drilling at about 1,200 feet.

AT BALD HILL.

The Tulsa Oil company No. 1 on the Semke farm in section 24-17-12 is a test.

The Secret of the Columbia Grafonola

The qualities that lead musicians of distinction to the choice of the Columbia Grafonola are qualities that are hidden beneath the surface. Outwardly this instrument is a beautiful piece of cabinet work, distinguished by perfect craftsmanship and a native sense of finish, with little to indicate its real character, but beneath its structural grace of proportions is the correctness of acoustic design that makes the Columbia Grafonola as responsive to every gradation of sound—as exquisitely sensitive to the slightest vibration as a rare old Cremona violin.

COLUMBIA GRAFONOLA. PRICE \$150

When you think of the "Grafonola"

Think of it as the only instrument having the perfect tone control and continuous wooden sound chamber.

Columbia records will play on Victor talking machines. Likewise Columbia Grafonolas will play Victor records.

A SURE SHOT PROPOSITION

In the Tampoco District of Old Mexico. Close to Elano, close to Tepic, a 60,000-barrel producer a short distance south and a 10,000 producer within three quarters of a mile.

I spent four years in that district and am in a position to give you valuable information of this and other valuable holdings, and would particularly recommend this as a wonderful opportunity to the operator who would obtain or increase holdings in that highly productive field.

This property is located on the Pannos and is surrounded by productive wells and is one of the choicest properties obtainable.

If it were known in that district that it was for sale, it would be transferred within twenty-four hours to resident parties. It is only through my Mexican connections that I am able to offer and deliver same.

I would submit correspondence only from responsible parties who possess nerve and dollars, and who will consider a tract of several thousand acres all oil-bearing territory. Address

E. S. COMINGS. 204 Dwight Bldg., Kansas City, Mo.

AT EL DORADO.

Frazier and others have made a location for a test on the Morley farm in section 23-25-12.

AT WARNER.

Talbot and others' test in section 23-25-12 is shut down at 1,300 feet for casing and will resume drilling Monday.

AT HEALDTON.

The Producers Oil company's test in section 26-4-3 got a dose of salt water at 1,800 feet and will abandon the hole.

NORTHWEST OF SAPULPA.

The Washington Oil company No. 1 on the C. Tahledge farm in the northwest corner of section 10-14-11 is good for 20 barrels after a shot.

AT CLEVELAND.

Shoenfelt and Markham are drilling at 600 feet in their test in 24-21-7.

AT LEBANON, OKLA.

Coombs and Redure are shut down waiting for an underreamer at 1,175 feet in 5-7-4.

EAST OF BOYNTON.

Yancy and others have a rig up for a test on the Sango farm in 1-14-17.

SOUTH OF DEPEW.

The Gypsy Oil company's test on the Johnson Lowe farm in 10-14-7 is drilling at 950 feet.

NORTH OF HEALDTON.

The Gypsy Oil company is running the 6-inch casing at 1,425 feet in its test on the Mattie Morris farm in 24-2-3.

AT BIXBY.

The Gypsy Oil company is setting a liner at 2,995 feet in its test in the southwest corner of 12-18-14.

BIG BOOTH SAND WELL.

The Gypsy Oil company's No. 1 on the Thomas farm in 24-14-16, offset-
